### 检测数据 / 结果

Data / Results of Verification

#### 检测说明

instruction for test

(1) 水来源 water is from:

成都地下水 groundwater in Chengdu

通过量子除垢防垢系统处理后的成都地下水 (简称处理水)

The groundwater after treated by quantum descaling anti-scaling technique(Treated water)

(2) 防垢检测 anti-scaling test

分别将地下水和处理水装入铁器皿和铝器皿内, 连续加热至水蒸发完, 检测器皿重量, 器皿的质量增量为成垢质量。

Fill in the iron & aluminum ware with the groundwater and treater respectively, and heat the water continuously so that all the water is evaporate. Then check the weight of the ware.

The added weight is for the scale.
